

Improvements Document

IMPROVEMENTS DOCUMENT

1. Structural Improvements

- Add clear sections for introduction, data cleaning, descriptive statistics, models, and conclusions.
- Place research questions prominently at the beginning.
- Add an appendix for extended results.

2. Analytical Improvements

- Compare models directly using R^2 , AIC, or adjusted R^2 .
- Explain why variables become significant or insignificant when added or removed.
- Add a model comparison table summarizing all results.

3. Interpretation Enhancements

- Highlight effect sizes (e.g., \$7,046 per year of experience).
- Clarify gender effects and note limitations.
- Explain why interaction terms change coefficient interpretations.

4. Visualization Enhancements

- Add scatterplots for salary vs. experience.
- Boxplots for salary by gender and job title.
- Include a residual plot for model diagnostics.

5. Final Reporting Improvements

- Add a dedicated section explicitly answering each research question.
- Provide a clear conclusion summarizing key findings.
- Suggest future data collection or improvements.
